Electric door opener 12V

Article No.: AC2000

PYLOCX Electric door opener 12V

Properties

- Compatible with all PYLOCX control modules
- Suitable for all common strike plates
- Can be combined with strike plates with latch guide (standard) without FaFix
- Can be used on the right-hand and left-hand side thanks to 180° rotated assembly
- Steel latch

Functional description

After PYKEY and the control module signal that a door is to be opened, the door opener opens. In de-energised operation, PYKEY supplies the energy required for opening.
