Electric mortise lock 12V

Article No.: AC3000

PYLOCX Electric mortise lock 12V

Properties

- Electrically lockable panic lock
- VDS C
- Reversible cam
- Adjustable for outward/inward opening
- Matt stainless steel forend, rounded
- 9 mm split nut
- With changeover
- Integrated control electronics (12 – 24 V DC)
- Various backsets available on request
- Matching handle sets available on request

Functional description

The EK lock for double-leaf doors has an automatic locking mechanism with a mechanical panic function on the inside handle. This allows exit at any time. The outside handle is electrically engaged, i.e. access can be controlled electrically. The necessary signal is transmitted via PYKEY and the control module unit. In the event of a power failure, the PYKEY supplies the energy required for opening.
