

## 12V electric mortise lock

Article No.: AC3000

---

PYLOCX® Electric mortise lock 12V

### Properties

- Electrically connectable panic lock
- VDS C
- Latch deadbolt can be thrown
- Adjustable for outwards/inwards
- Forend in matt stainless steel, rounded
- 9 mm split Nut
- With change
- Integrated control electronics (12–24 V DC)
- Various backsets available on request
- Matching lever handle sets available on request

### Functional description

The EK lock for double-leaf doors has an automatic locking mechanism with a mechanical panic function on the inside handle. Exit is therefore possible at any time. The outside lever handle is electrically engaged, i.e. access can be controlled electrically. The signal required for this is sent via PYKEY® and the control module unit. In de-energised mode, the PYKEY® supplies the energy for opening.
