

HSL double bit deadbolt/slam-lock with lever handle additional latch (with switch)

Article No.: HSL 106

Bolt lock with single-turn bolt throw. The standard version of the lock has a follower and the single throw version has a mechanical external visual indicator on the key guide side.

Properties

- Handle function for administrative doors
- Easy operation with HSL double bit key (single throw)
- Keyed different can be set without a conversion key

Functional description

The HSL double bit key is inserted into the lock. The deadbolt is locked back with the key via a turn (180° turn). The door can be opened by pressing the lever handle. The door is closed. The deadbolt is locked forward with the key via a turn (180° turn). The door is fully locked, the lever handle is locked against insertion. Changing the locks The locking mechanism can be changed to a different lock when unlocked (deadbolt locked back). This requires a key for the current locking system and a key for the future locking system. Type HSL 106 is designed for administration and passage doors. The deadbolt is locked forwards and backwards via a tour (180° key rotation). The lever handle is locked when the deadbolt is locked forwards. The key can be removed when locked and unlocked.

Technical data

Material	Stainless steel
Surface	Matt
Nut [mm]	9
Faceplate dimension [mm]	280 x 30 x 4
Forend material	Stainless steel
Material deadbolt	Stainless steel
Lock housing material	Stainless steel
Locking mechanism	HSL double bit
Levers	7
Recodability	yes
Weight [kg]	3,3
Lock dimensions [mm]	200 x 22 x 220
bolt throw mm	20
latch bolt exclusion mm	14
external visual indicator	mechanical
Closing processes	500.000

Technical data

Max. lateral transom load capacity [kN]	50
Relative humidity	95% non-condensing
Relative humidity [%]	95% non-condensing
