

HSL double bit food hatch lock with latch bolt, two-turn

Article No.: HSL 204

Latch bolt lock with two-turn locking mechanism. In the standard version, the lock has a mechanical external visual indicator on the key guide side.

Properties

- Easy operation with HSL double bit key (2-tour)
- Keyed differentiable without a change key

Functional description

The locking mechanism can be changed to a different locking system when unlocked (latchbolt locked back). This requires a key from the current keyed system and a key from the future keyed system. Type HSL 204 is designed for detention room and passage doors. The latchbolt is released via a first turn (180° key turn) and relocked via a second turn (180° key turn). The key can be removed when the door is locked and unlocked
