

## HSL double bit retrofit deadlock - comparable to CHUBB® model 3G112/3G117

Article No.: HSL C801X

The HSL C801X is a modular lock system that allows you to replace previous Chubb® locks with a modern high-security lock in just a few minutes. No conversion of the doors is necessary. STUV offers exactly the same lock dimensions as your existing 3G112/3G317 Chubb® locks.

### Properties

- The lock can be ordered with three different locking options: MK1 (night lock - double action), MK2 (four-eyes principle) or MK3 (single action)

### Functional description

Bolt lock for passage doors with single-turn bolt throw.  
As a replacement lock for previous locks from other manufacturers - 1:1 replacement for previous locks from other manufacturers - Stainless steel deadbolt with 20 mm throw - Simple operation with HSL double bit key - Keyed changeover without changeover key

### Technical data

Material	Stainless steel
Surface	Matt
Faceplate dimension [mm]	162 x 32 x 5 (+2)
Forend material	Stainless steel
Material deadbolt	Stainless steel
Lock housing material	Stainless steel

## Technical data

Locking mechanism	HSL double bit
Levers	7
Recodability	yes
Weight [kg]	2,2
Lock dimensions [mm]	172 x 22 x 114
bolt throw mm	20
Closing processes	1.000.000
Max. lateral transom load capacity [kN]	50
Relative humidity	95% non-condensing
Relative humidity [%]	95% non-condensing
