

Press-and-squeeze cap (insulated)

Article No.: PHV 200

The attached, single-sided pressing lever lock system made of investment casting stainless steel presses smaller doors and hatches into the door seal all the way round with its worm gear in conjunction with a contact pressure bevel in the strike. The robust and heat-insulating coating means that the system also works in extreme environments.

Properties

- Stainless steel investment casting, grinded and blasted
- Lever with heat-insulating coating
- For right- or left-hand version
- With one-piece worm gear
- Suitable for hot devices
- Strike plate for various offsets

Locations

- Oven manufacturer
- Cooking and smoking technology
- K
