

PYLOCX control module 48V (external power supply required)

Article No.: PL2012

PYLOCX control module designed for a 48V power supply. For controlling external peripherals, such as single-point locking systems, multi-point locking systems, rotary latch locks, mortise locks, and others.

Properties

- PYLOCX Control Module 48V
- Designed for powered operation
- Required for power-free opening: PL1012 emergency charger
- Opening via one-time code or fixed PIN
- Readable opening log with up to 10,000 entries
- VdS-certified
- IP52
- Temperature range: -20°C to 50°C

Functional description

After entering the code, the PYKEY is placed on the corresponding contact point of the device. The code is transmitted, and power is supplied to the device to open it, if necessary. When the power supply is connected, automatic closing via the door latch contact is possible. Powerless opening is possible with the optional PL1012 emergency charger.
