PYLOCX swinghandle lock

Article No.: PL7100

Swinghandle with integrated PYLOCX® security half cylinder.

Properties

- Electronic cylinder with solid stainless steel knob
- Swinghandle made of weatherproof zinc die-cast
- Burglary resistance: resistance class 2
- Suitable for all hole dimensions
- For indoor and outdoor use (IP68)
- Existing swinghandles can be replaced (retrofit)

Functional description

The PYKEY transmits the power and data required to release the swing handle. Once authentication has been successful, the electronic half cylinder is released and the swing handle can be opened by turning the convenient operating knob. A 45° movement activates the linkage behind the swing handle, giving you the option to unlock or lock the door.

Technical specifications

Material	Zamak 5
