

## HSL end ring

Article No.: RB 500

---

HSL locking rings are used on one or both sides, depending on the lock function. The result is a precise functional unit and a perfectly protected locking mechanism.

### Properties

- For HSL key escutcheons with a diameter of 60 mm
- For profile cylinder escutcheons with a diameter of 60 mm
- With 4 lugs for fixing

### Functional description

HSL locking rings are pushed over the key escutcheon and fixed to the door leaf using four fixing bars.
