

HSL finishing ring

Article No.: RB 500

HSL locking rings are used on one or both sides, depending on the lock function. The result is a precise functional unit and a perfectly protected locking mechanism.

Properties

- For HSL keyhole escutcheons with a diameter of 60 mm
- For profile cylinder bezels with a diameter of 60 mm
- With 4 fixing lugs

Functional description

HSL cover rings are slid over the key escutcheon and fixed to the door leaf using four fixing bars.
