

HSL weather protection rosette

Article No.: RB 602

Weather protection rosette for indoor and outdoor use.

Properties

- For HSL/HSL-C locks
- Protection against rain, dirt and draughts outdoors
- Simple screw-on installation
- Slider is lifted with a key – no second hand required

Functional description

The screw-on weatherproof escutcheon provides optimum protection for locks in doors and gates in correctional facilities. The escutcheons are made of high-quality stainless steel, which is not only corrosion-resistant but also withstands high mechanical loads. The screw-on mounting makes this bezel particularly suitable for retrofitting on existing doors and gates. The dimensionally stable construction offers reliable protection against moisture, dirt and temperature fluctuations. At the same time, it makes tampering difficult and offers additional protection against vandalism.
