HSL lifthandle for Basquill/cam locks

Article No.: RB 700

Ergonomically designed lifthandle with stable four-point screw connection. Rounded edges for safe operation.

Properties

- Robust and ergonomically shaped version made of stainless steel investment casting
- Integrated over-rotation protection

Functional description

The lever handle made of investment casting stainless steel is designed for use with Basquill locks. In combination with a lock (e.g. HSL 301 and HSL 302), a three-point locking is achieved.
The bezel of the ergonomically shaped lever handle is bolted directly to the lock. The square pin engages in the lock nut.
An integrated anti-rotation device prevents damage to the lock.
