Lock box for mechanical HSL/SL locks

Article No.: ST 100

Stainless steel lock box for purely mechanical HSL / SL locks of the 100 series

Properties

- For mechanical HSL high-security locks
- For mechanical SL security locks
- Made entirely of stainless steel
- For welding

Functional description

The door manufacturer receives the lock box directly from STUV and welds it into the door leaf. This simplifies the installation and removal of the locks on the construction site or for replacement purposes. In addition, the locks are correctly aligned and seated in the door leaf without tension. STUV offers a suitable lock box for almost all lock types. Only BGH locks with bar locking are installed without a pocket.
The lock pocket is mounted using the four mounting tabs provided. Two mounting tabs are located on the open lock insertion side, two more on the rear, closed side. The tabs are preferably welded in place.
