

Lock box for mechanical HSL/SL locks

Article No.: ST 100

Stainless steel lock box to accommodate purely mechanical HSL / SL locks from the 100 series

Properties

- For mechanical HSL high-security locks
- For mechanical SL security locks
- Completely made of stainless steel
- For welding on

Functional description

The door manufacturer receives the lock box directly from STUV and welds it into the door leaf. This simplifies the installation and removal of the locks on site or for replacement purposes. In addition, the locks are correctly aligned and tension-free in the door leaf. STUV offers a suitable lock box for almost all lock types. Only BGH locks with rod locking are installed without a pocket. The lock pocket is fitted using the four fixing lugs provided. Two fixing lugs are located on the open lock insert side and two more on the rear, closed side. The tabs are preferably attached by welding.
