Lock box for mechanical multi-point locking system

Article No.: ST 400

Stainless steel lock box for mechanical HSL multi-point locks of the 402 series (main lock)

Properties

- For mechanical HSL high-security multi-point locks
- Made entirely of stainless steel
- For welding
- Functional element for main lock

Functional description

The lock box is supplied directly to the door manufacturer by STUV and is welded into the door leaf. This simplifies the installation and removal of the locks on site or for replacement purposes. In addition, the locks are correctly aligned in the door leaf.
Multi-point locks are supplied with one lock box for the main lock and two lock boxes for the additional locks. All three lock boxes are connected to each other via flat rods and form a functional unit.
