HSL mounting plate for HSL C17X

Article No.: ST 900

The mounting plate for the HSL C175 and C171 locks is used for surface mounting. The HSL C175 and C171 locks can be installed either flush with the door leaf or as surface-mounted box locks. For the latter variant, the mounting plate is used in combination with the mounting frame.

Properties

- Precisely designed for use with HSL C175 and C171 locks
- For surface mounting in combination with mounting frame

Functional description

The lock is fastened to the mounting plate with stainless steel security screws. The security features, precise fit and corrosion-resistant materials ensure that high-security locks type HSL C175 and C171 can deliver their full potential.
