

HSL Mounting plate for HSL C17X

Article No.: ST 900

The mounting plate for the HSL C175 and C171 locks is inserted as part of the surface-mounted installation. The HSL C175 and C171 locks can be installed either flush with the door leaf or as a surface-mounted box lock. For the latter variant, the mounting plate is used in combination with the mounting frame.

Properties

- Designed to fit HSL C175 and C171 locks
- For surface mounting in combination with mounting frame

Functional description

The locks are fastened to the mounting plate using stainless steel security screws. The security features, precise installation and corrosion-resistant materials ensure that HSL C175 and C171 high-security locks can fulfil their full potential.
