Door handle set, handle/handle

Article No.: TÜ300

The stainless steel door handles are mainly used on interior doors that have to meet high hygiene standards, such as in the food industry and clean rooms.

Properties

- FS door handle set 9 mm
- Stainless steel
- Profile cylinder drilled, optionally drilled for Swiss round cylinders or blind
- Without accessories

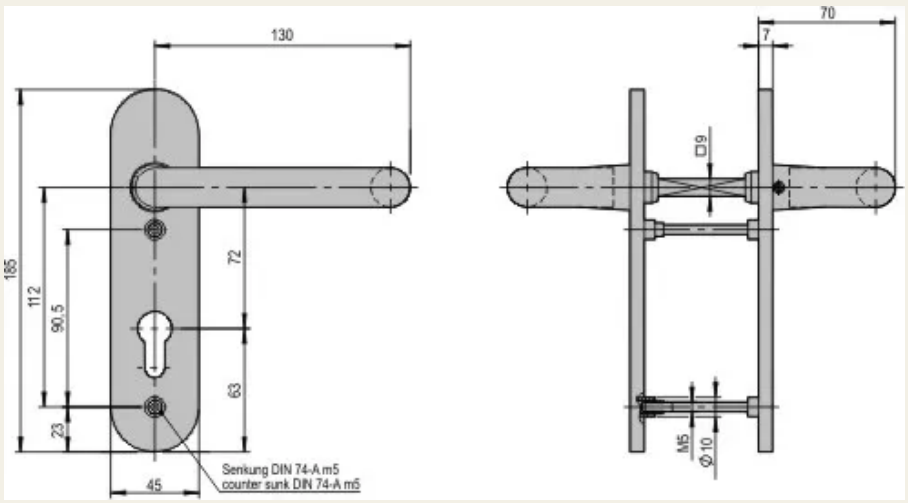

Functional description

These handles are available with a short backplate. Versions for profile cylinders, Swiss round cylinders or in blind are possible. Sets for different door thicknesses are also available.
