Folding ring handles, screw-on

Article No.: TÜ3400

The folding ring handles are used, for example, in gymnasiums or sports halls to operate doors. They are recessed into the door leaf and do not protrude. This minimises the risk of injury.

Properties

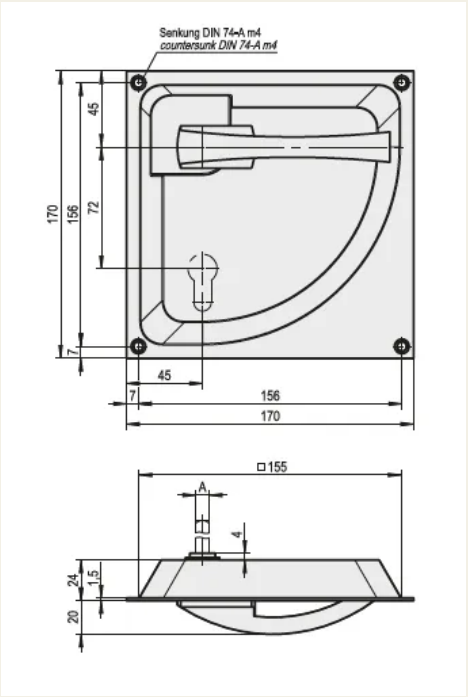

- Pull and folding handle made of aluminium
- Swiss round cylinder or BB on request
- Minimum distance for profile cylinder hole 55 mm
- Version also available in steel or stainless steel
- Special colours on request

Functional description

These handles are made of aluminium and are visible in four places.

Technical specifications

Material	Aluminium
Surface	Anodised
Colour	Silver
