Folding ring handles, screw-on

Article No.: TÜ3450

The folding ring handles are used, for example, in gymnasiums or sports halls to operate doors. They are recessed into the door leaf and do not protrude. This minimises the risk of injury.

Properties

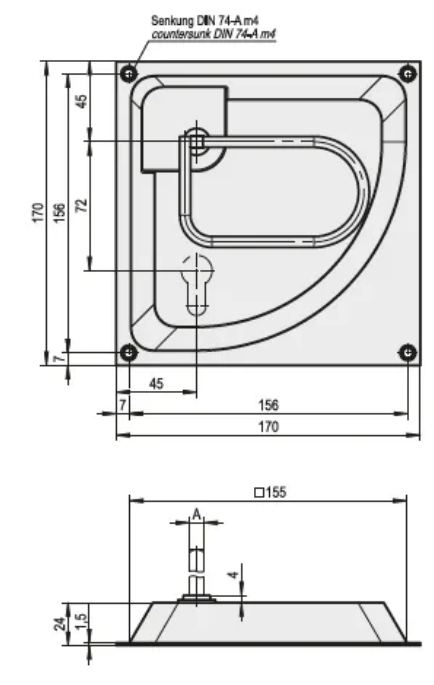

- Steel pull and aluminium folding ring
- Swiss round cylinder or BB on request
- Minimum distance for profile cylinder hole 55 mm
- Shell also available in aluminium
- Special colours on request

Functional description

These handles are made of steel and are visible in four places.
