

Heavy-duty hinge with cable transmission

Article No.: TB 200

The tamper-proof screw-on version in stainless steel corresponds externally to the load-bearing AISI304 hinges. The completely preassembled cable transmission has a 25-core flat cable protected against breakage.

Properties

- Cable transition strip made of stainless steel
- Tamper-proof
- For screw mounting
- Height adjustable up to 8 mm
- 25-core

Functional description

The height-adjustable cable transition strips from STUV have been specially developed for high-security applications. As an addition to a pair of load-bearing strips, they are the ideal complement for doors with electrical connections for motor or mechatronic locks. The cable transition strips have been successfully tested with an opening angle of 170° and over 1 million cycles.
