

## Heavy-duty hinge with cable transmission

Article No.: TB 200

---

The tamper-proof screw-on version in stainless steel corresponds externally to the load-bearing AISI304 hinges. The completely preassembled cable transmission has a 25-core ribbon cable that is protected against breakage.

### Properties

- Cable transition tape made of stainless steel
- Tamper-proof
- For screwing on
- Height-adjustable up to 8 mm
- 25-core

### Functional description

The height-adjustable cable transition hinges from STUV have been specially developed for high-security applications. As a supplement to a load-bearing hinge pair, they are the ideal addition for doors with electrical connections for motorised or mechatronic locks. The cable transition hinges have been successfully tested at an opening angle of 170° with over 1 million cycles.
