Mortise lock with changeover, 2 profile cylinders

Article No.: TS200

The mortise locks with double profile cylinder are designed for metal tubular frame doors. They are used in steel or aluminium doors. They offer the option of being driven by two profile cylinders.

Properties

- Forend, stainless steel
- Removal: PZ1 60 mm, PZ2 108 mm
- Matching slide rosettes
- Version with anti-panic function E on request

Functional description

These deadbolt slam-locks can be equipped with two profile cylinders, e.g. to create different locking circuits. They are also equipped with a changeover device so that the deadbolt can be locked forward and backward and the latch can be retracted via the profile cylinders.
