

Mortise lock with changeover, 2 profile cylinders

Article No.: TS350

The mortise locks with double profile cylinder are designed for solid doors. They are used in wooden or steel doors. They offer the option of being driven by two profile cylinders.

Properties

- Round forend, zinc-plated steel
- Bolt throw 1 turn 12 mm
- Latch, deadbolt without projection
- Stainless steel forend available on request

Functional description

These deadbolt slam-lock locks can be equipped with two profile cylinders, e.g. to create different locking circuits. They are also equipped with a changeover mechanism so that the deadbolt can be locked and unlocked and the latch can be retracted via the profile cylinders.
