

Mortise lock, 2 profile cylinders with AP function

Article No.: TS500

The mortise locks with double profile cylinder are designed for metal tubular frame or solid leaf doors. In addition to the deadbolt and latch, they lock upwards and downwards via espagnolette rods.

Properties

- Forend edged, steel zinc-plated
- 1-turn bolt throw 15mm
- Latch, deadbolt without projection
- Lock with transmission
- Lock can be operated with 1 or 2 profile cylinders

Functional description

These deadbolt slam-locks can be fitted with two profile cylinders, e.g. to realise different locking circuits. The lock is equipped with a second square follower, which can be used to open the lock at any time. This anti-panic function makes it possible to leave the room at any time. The locks are used in doors for transformer stations, among other things.

Technical data

Material	Steel
Surface	Zinc-plated
Colour	Silver
Dimensions LxWxH	250x136x17

Technical data

Backset	82/118 mm
Distance	72 mm
Nut [mm]	9
Faceplate dimension [mm]	400x30x3
Forend material	Steel zinc-plated
Material deadbolt	Stainless steel
Lock housing material	Steel zinc-plated
bolt throw mm	15
Dimensions [mm]	250 x 136 x 17
Backset [mm]	82/118
Distance [mm]	72
