Pressing lever lock with locking pin

Article No.: TV200

The pressing lever locks are used for large doors or gates. They have a long clamping distance and are usually used for doors with hose seals.

Properties

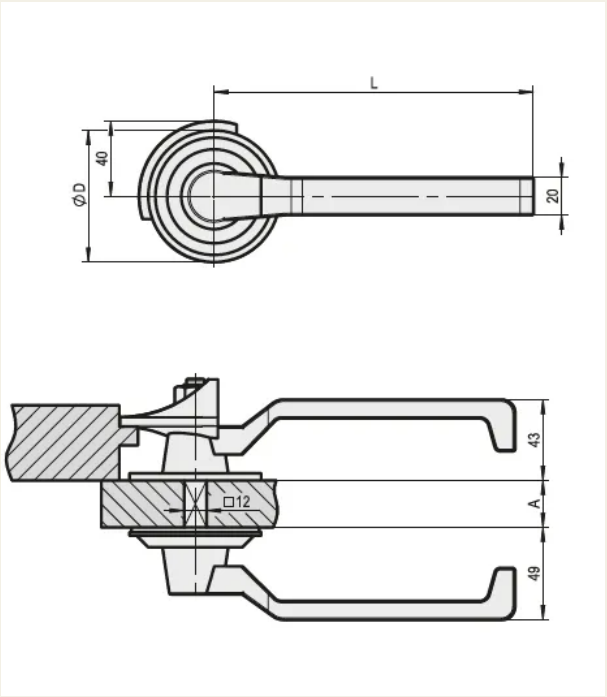

- Locking pin in bare steel
- Handle made of light metal
- Bearing plate in zinc-plated steel
- Other door thicknesses available on request

Functional description

The handles of these locks are made of aluminium and coated with black EPS. Various versions are available for different door thicknesses.
