# Mortise lock with change, 3 profile cylinders

Article No.: V01300281/2

The mortise locks with triple profile cylinder are designed for solid doors. They are used in wooden or steel doors. They offer the option of being driven by three profile cylinders.

## Properties

- Round forend. Zinc-plated steel
- Bolt throw 1 turn 15 mm
- Latch and deadbolt without projection
- With special screw for cylinder fixing
- Forend in stainless steel on request

## Functional description

These deadbolt locks can be equipped with three profile cylinders to create different locking circuits, for example. They are also equipped with a changeover mechanism so that the deadbolt can be locked and unlocked and the latch can be retracted via the profile cylinders. The locks are equipped with a 9 mm square nut.
