Zinc-plated steel cam with 2 mm offset

Article No.: V02005270

The cam serves as height adjustment for a corresponding quarter turn of your choice and can thus compensate for differences between the housing frame and the locking flap. The cams are available in neutral, positive and negative versions, depending on the installation location.

Properties

- Right-hand version / left-hand version
- Compact design
- Versatile application possibilities (with different quarter turn locks)
- Available mounted on a quarter turn lock on request

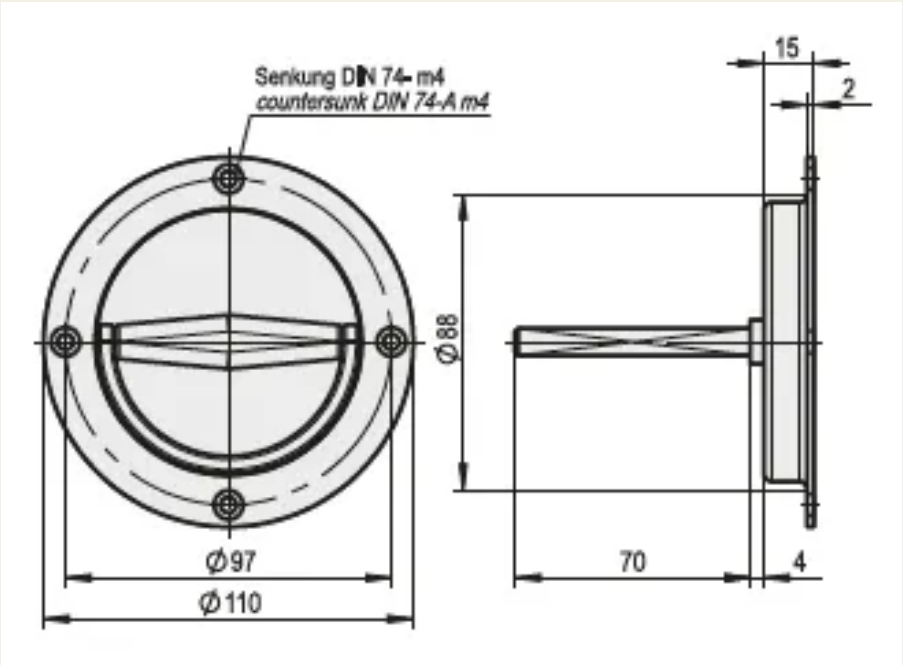

Technical specifications
