

Zinc-plated steel cam with 2 mm offset

Article No.: V02005270

The cam serves as a height adjustment for a corresponding quarter turn of your choice and can thus overcome differences between the housing frame and the flap. The cams are available in neutral, positive and negative offset versions - depending on the installation location.

Properties

- Can be used in right-hand or left-hand versions
- Compact design
- Versatile (can be used with different types of quarter turns)
- Can be supplied fitted to a quarter turn on request
