

**Zinc-plated steel cam for Mammut quarter turn,  
non-cranked**

Article No.: V02067000

The cam serves as a height adjustment for a corresponding quarter turn of your choice and can thus overcome differences between the housing frame and the flap. The cams are available in neutral, positive and negative cranked versions - depending on the installation location. This special type of cam is suitable for our popular MAMMUT compression latches.
