

Stainless steel rotary bolt housing with Ø 28 mm

Article No.: V02962230

The quarter turn lock housing holds the lock insert and, in combination with the cam, forms the actual quarter turn lock, which is finally equipped with a cam tailored to the specific application. As with the cams and insert parts, there are differences in materials and housing diameters – from a more prominent and solid appearance to inconspicuous and rather delicate models.

Technical specifications

Material	Stainless steel
