Self-adhesive cell sponge rubber 10x3 EPDM

Article No.: V07700390

Cell sponge rubber, also known as cellular rubber, is a versatile, closed-cell elastomer that is perfect for industrial applications requiring reliable sealing, insulation and elasticity.

Properties

- Increased temperature range (delta: 70°C)
- Impermeable to liquids and gases
- Non-expanding and self-adhesive
- Numerous thicknesses and widths available on request

Functional description

Thanks to its closed cell structure, cell sponge rubber offers excellent elasticity and high sealing properties. It dampens vibrations, reduces noise and insulates heat effectively. The unique pore structure makes cell sponge rubber the ideal choice for demanding industrial applications.

Technical specifications

Material	EPDM
Surface	Matt
Colour	Black
Standards	DIN EN 1.514-1
Fixing type	With adhesive tape

Technical specifications

Dimensions LxWxH	B = 10 mm, H = 3 mm
