

Edge protection profile with clamping range 1.0–4.0 mm EPDM

Article No.: V07800130

The edge protection profile is made of PVC and therefore offers medium temperature dispersion. An integrated metal clamping strip covers a clamping range of 1.0–4.0 mm. With a low installation height of only 14.5 mm and a width of 10.0 mm, the product is ideal for low-profile areas.

Properties

- Average temperature spread (delta: 60°C)
- Wide clamping range (1.0–4.0 mm)
- Edge construction with a height of only 14.5 mm and a width of 10.0 mm
- Easy installation thanks to metal clamping strip
- Improved aesthetics
- Weather resistance and durability
- Other colours available on request
- Custom lengths available on request for increased requirements

Functional description

Edge protection profiles provide reliable protection against injuries caused by sharp edges and ensure a clean, uniform appearance. Thanks to the flush clamping structure made of wire or steel clamping tape, the edge protection profiles can be installed without adhesive.

Technical specifications

Material	PVC
Surface	Slightly shiny

Technical specifications

Colour	Black
Standards	DIN EN 1.514-1
Fixing type	With clamping strap
Feature	Flame resistant
Temperature range	0°C - 60°C
Shore hardness	70 Shore
Dimensions LxWxH	B = 10 mm, H = 14.5 mm
