

Edge protection profile with clamping range 1.0-4.0mm PVC

Article No.: V07800180

The edge protection profile is made of black PVC and therefore offers a medium temperature spread. An integrated metal clamping strip covers a clamping range of 1.0-4.0mm. With a low installation height of just 16.0 mm and a width of 10.0 mm, the product is ideal for areas with low structures.

Properties

- Medium temperature spread (delta: 60°C)
- Ready clamping area (1.0-4.0mm)
- Edge construction with a height of only 16.0mm and a width of 10.0mm
- Protection against damage from sharp edges and corners
- Easy installation with metal clamp
- Improved aesthetics
- Individual lengths for increased demand on request

Functional description

Edge protection profiles reliably protect against injuries caused by sharp edges and ensure a clean, homogeneous appearance. Thanks to the flush clamping structure made of wire or steel clamping tape, the edge protection profiles can be installed without adhesive.

Technical data

Material	PVC
----------	-----

Surface	Slightly shiny
---------	----------------

Technical data

Colour	Black
Dimensions LxWxH	W= 10 mm, H= 16 mm
Standards	DIN EN 1.514-1
Fixing type	With clamping strap
Feature	Flame retardant
Temperature range	0°C - 60°C
Shore hardness	70 Shore
