

Sealing clip-on profile with clamping range 2.0 EPDM

Article No.: V07800750

The sealing clip-on profile is made of black EPDM and therefore offers a high temperature range. An embedded steel spring core covers a clamping range of 2.0 mm. Thanks to its small bending radius, the product is extremely versatile.

Properties

- High temperature range (delta: 100°C)
- Custom lengths available on request for increased requirements
- Bending radii: A=30, B=40, C=30, D=60

Functional description

Sealing profiles are easy to install and ensure reliable sealing in a wide range of applications.

Technical specifications

Material	EPDM
Surface	Matt
Colour	Black
Standards	DIN EN 1.514-1
Fixing type	With clamping strap
Temperature range	-60°C to +160°C
Shore hardness	30 Shore

Technical specifications

**SECURITY
MADE IN GERMANY
SINCE 1883**

Dimensions LxWxH

A = 30 mm, B = 40 mm, C = 30 mm, D = 60 mm
