

Self-adhesive cell sponge rubber 15x4 EPDM

Article No.: V07800870

Cellular rubber sealing tape is the ideal product for all insulation and sealing work. However, cellular rubber strips are also popular for soft bearings and as damping material. It has a self-adhesive film on the back which provides an ideal grip on various (clean and dust-free) surfaces.

Functional description

When it comes to insulation and sealing applications, cellular rubber can really show off its strengths. As the cells of the rubber foam are closed-cell, sealing tape made from cellular rubber is highly watertight and airtight. This outstanding property makes cellular rubber a very popular sealing and insulating material. In addition, the sealing tape remains permanently elastic even under unfavourable conditions such as severe weather conditions. Furthermore, cellular rubber strips made of EPDM are resistant to ageing and weathering and are characterised by high UV and ozone resistance.

Technical data

Material	EPDM
Surface	Matt
Colour	Black
Dimensions LxWxH	W= 15 mm, H= 4 mm
Standards	DIN EN 1.514-1
Fixing type	With adhesive film

Technical data

Temperature range -60°C - +160°C

Shore hardness 30 Shore
