Self-adhesive cell sponge rubber 20x5 EPDM

Article No.: V07800940

The sealing tape made of cellular rubber is the ideal product for all insulation and sealing work. However, cellular rubber strips are also popular for soft mounting and as a damping material. It has a self-adhesive film on the back, which provides ideal adhesion to various (clean and dust-free) surfaces.

Functional description

When it comes to insulation and sealing applications, cellular rubber can really show its strengths. Since the cells of the rubber foam are closed, sealing tape made of cellular rubber is highly water- and airtight. This outstanding property makes cellular rubber a very popular sealing and insulating material. In addition, the sealing tape remains permanently elastic even under unfavourable conditions such as severe weather conditions. Furthermore, cellular rubber strips made of EPDM are resistant to ageing and weathering and are characterised by high UV and ozone resistance.

Technical specifications

Material	EPDM
Surface	Matt
Colour	Black
Standards	DIN EN 1.514-1
Fixing type	With adhesive tape
Temperature range	-60°C to +160°C

SECURITY
MADE IN GERMANY
SINCE 1883

Technical specifications

Shore hardness	30 Shore
Dimensions LxWxH	B = 20 mm, H = 5 mm
