Cell sponge rubber, self-adhesive, 10x4, neoprene

Article No.: V07801410

The sealing tape made of cellular rubber is the ideal product for all insulation and sealing work. However, cellular rubber strips are also popular for soft mounting and as a damping material. It has a self-adhesive film on the back, which provides ideal adhesion to various (clean and dust-free) surfaces.

Functional description

Neoprene cellular rubber has closed cells, making it waterproof and unable to absorb liquids. It withstands contact with seawater, is flame retardant and reasonably resistant to oil. The material is often used in shipping and offshore applications, but also for sealing in industry.

Technical specifications

Material	Neoprene
Surface	Slightly shiny
Colour	Black
Standards	DIN EN 1.514-1
Fixing type	With adhesive tape
Temperature range	-40°C to +110°C
Shore hardness	70 Shore A
Dimensions LxWxH	B = 10 mm, H = 4 mm
