

Self-adhesive cell sponge rubber 10x4 neoprene

Article No.: V07801410

Cellular rubber sealing tape is the ideal product for all insulation and sealing work. However, cellular rubber strips are also popular for soft bearings and as damping material. It has a self-adhesive film on the back which provides an ideal grip on various (clean and dust-free) surfaces.

Functional description

Neoprene cellular rubber has closed cells, which makes it waterproof and does not absorb liquid. It can withstand contact with seawater, is flame-retardant and reasonably oil-resistant. The material is often used in shipping and offshore applications, but also for sealing in industry.

Technical data

Material	Neoprene
Surface	Slightly shiny
Colour	Black
Dimensions LxWxH	W= 10 mm, H= 4 mm
Standards	DIN EN 1.514-1
Fixing type	With adhesive film
Temperature range	-40°C - +110°C
Shore hardness	70 Shore A
