Spring-loaded ball, brass, nickel-plated, size 1

Article No.: V37704100

The spring-loaded ball catch is an ideal addition to doors and inspection flaps in cabinet construction or mechanical engineering and ensures that bolted components are held securely and stably in place by means of a simple locking mechanism using spring-loaded balls. Various sizes are available in our product range.

Properties

- Highly aesthetic (not visible from the outside)
- Reliable and secure locking of doors, flaps and drawers

Technical specifications
