Surface-mount enclosure for wall-mounted readers

Article No.: V85812120

Stainless steel surface-mount housing for the PYPROTECT RS485 wall reader, designed for secure and neat wall mounting. The rugged, tamper-protected housing reliably protects the wall reader in indoor and protected outdoor environments. It features an integrated 10-pin twisted-pair distributor, enabling clear wiring and easy installation. Ideal for professional access control systems with high requirements for security, stability, and ease of installation.

Functional description

Stainless steel surface-mounted housing for wall-mounted readers, tamper-protected, 10-port twisted-pair distributor

Places of use

- Areas where flush-mount installation is not possible, or is possible only with considerable effort.
