Transponder Keyfob blau

Article No.: V85812154

The transponder key fob is a compact and reliable solution for contactless identification and access control. Thanks to its rugged construction and convenient key fob design, it is ideal for daily use in correctional and forensic facilities. The keyfob enables quick authentication at compatible readers and stands out for its durability and ease of use. Available in various colors and compatible with standard RFID and transponder systems.

Properties

- Kompakter RFID-Transponder im praktischen Schlüsselanhänger-Format Kompatibel mit dem PYPROTECT® RS485 Wandleser Kontaktlose Identifikation durch einfaches Vorhalten Schnelle und sichere Authentifizierung Robustes und langlebiges Gehäuse für den täglichen Einsatz Ideal für Zutrittskontroll- und Schließsysteme Einfache Integration in bestehende RS485-Zutrittslösungen Hoher Bedienkomfort durch intuitive Nutzung Verfügbar in unterschiedlichen Farben Optional Kennzeichnung mit 4 Ziffern (Lasergravur)

Functional description

The Keyfob transponder serves as a convenient RFID identification device for use with the PYPROTECT® RS485 wall-mounted reader. Simply holding the Keyfob up to the wall-mounted reader enables fast and secure authentication for granting access or recording attendance.
In conjunction with the RS485-based access control system, the transponder enables reliable user identification and centralized management of access rights. The rugged design in a keychain format is ideal for daily use in industry, commerce, public facilities, and security-sensitive areas.
The keyfob supports convenient contactless operation and contributes to efficient and traceable access management.

Places of use

- Indoor and outdoor areas
